DT80 DataTaker

Key Benefits

- **Ease of deployment:** On-site connectivity via USB makes it easy to configure and test the deployed monitoring module

- **Universal:** Connects to any sensor. This universal logger can integrate with any type of sensor. Temperature, voltage, current, 4-20 mA loops, resistance, bridges, strain gauges, frequency, digital, serial and calculated measurements can all be scaled, logged and returned in engineering units or within statistical reporting

- **Robust:** With its solid aluminium case this logger is suitable for harsh environments

- **Cost effective:** Low maintenance product. Minimal attention needed after setup

DT80W

An integrated Wi-Fi module features a wireless connection to the logger, for connecting the logger to an existing Wi-Fi network. Programming and controlling can be done wirelessly.

DT80G

An integrated vibrating wire module feature vibrating wire channels which is suitable for land slide prevention, dam wall monitoring, mining exploration, tunnel excavation, concrete curing or any geotechnical application.

DT80C, DT80Cx

The C-Series Logger (DT80C, DT80CG, DT80CW and DT80CGW) has a slightly higher minimum operating temperature, for applications with a less demanding temperature range. These loggers maintain their respective functionality.

DT80GW

DT80GW has both DT80G and DT80W features combined, which will allow geotechnical applications to use wireless connection on Wi-Fi network.

dEX 2.0 (Logger Software)

A software with intuitive graphical interface for programming DataTaker that allows you to configure, view real-time data in widgets or charts and retrieve your historical data for analysis.

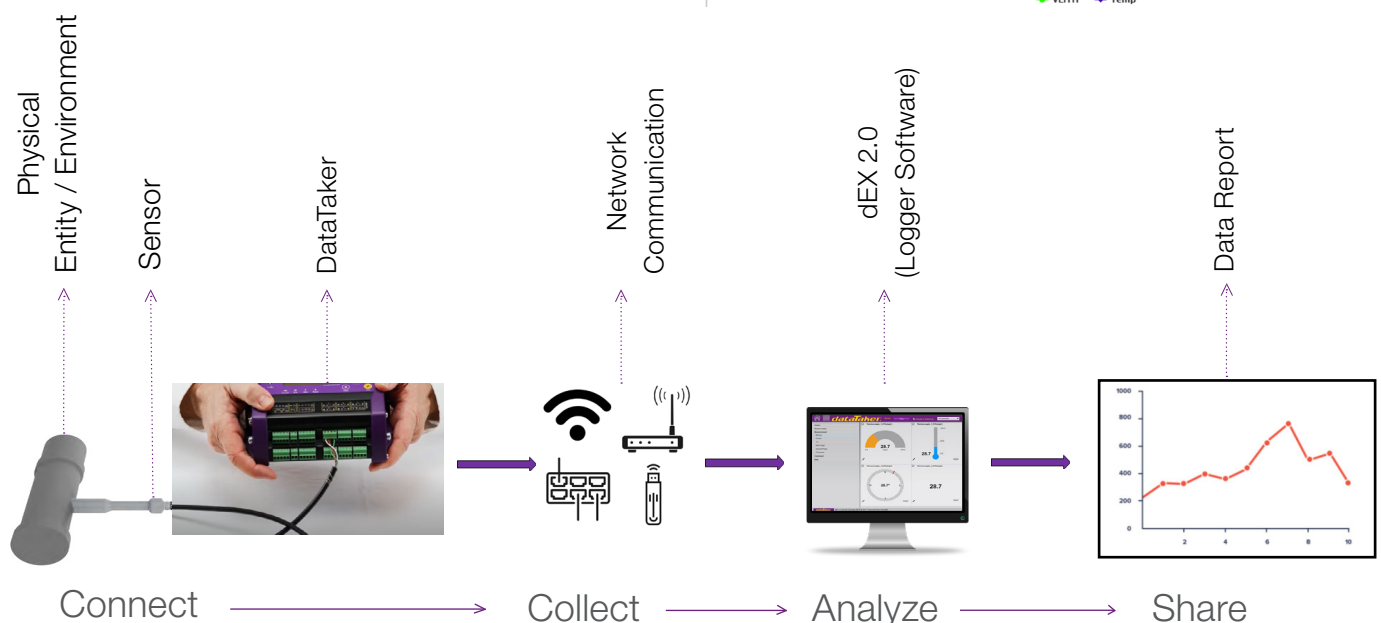

After installation you can run dEX 2.0 and establish connection with your logger through TCP/IP connection either using Ethernet or USB ports.
The software is available cross platform and will work on major operating system such as Windows, iOS and Linux.

Utilising Angular JS which allows one page application for simplicity, this dEX 2.0 draws a new approach on programming and viewing data like never been before.

Features:

- Compatible to previous dEX program

- Improved UI design with single centralise page which is easier to move between functions.

- Offline configuration (program template creation)

- Improved programming approach on schedule / channel creation

- Re-defining alarm declaration

- Re-defining MODBUS and SDI12 channels creation

- Home functions that target multiple loggers
