- Dual Frequency Simultaneous Measurement (LI5660/LI5655/LI5650)
Two sets of dual phase sensitive detectors enable two frequency components included in a single input signal to be measured simultaneously.
- Fractional Harmonic measurement
Measurements at submultiples frequencies of the fundamental wave (1 to 63) / (1 to 63)
- External 10 MHz synchronous input
Can be synchronized with the reference frequency of other devices by using an external reference frequency.
- Measurement parameters, Y, R, θ, DC, NOISE
- Interfaces USB, GPIB, RS-232, LAN
